

## WAGES RON SOFTWARE

The WAGES software is a complex solution for the processing of wages and HR agenda created to calculate wages of all types. Thanks to our considerable experience in the development of wages and HR systems, we have been able to create software that can be used by companies in all fields.

# WAGES RON SOFTWARE

Processing wages with our software is simple and easy. One of the major advantages is the interconnection to the attendance system, which supplies inputs for the wages processing itself.

The software includes hundreds of output sets and exports. Electronic communication with all banks, the public administration portal and the statistics bureau (Trexima) is of course included.

The wages programme can be expanded by HR modules – health checks, education, working tools register, workplaces, etc.

# WAGES INFORMATION ABOUT THE PRODUCT

---

## INDIVIDUAL APPROACH

All wages and HR systems are individually implemented and an analysis is conducted prior to the actual installation. In case of the necessity for data from another system to be transferred, the new wages system is thoroughly prepared.

The extent of data transferred is set. After the wages system is installed, the actual implementation and user training takes place. We provide assistance whilst wages are being processed for the first time using the system.

## OUTSOURCING

WE OFFER A MODERN SERVICE FOR WAGES PROCESSING AND HR MANAGEMENT. BECAUSE WE DEVELOP OUR OWN SYSTEM, WE ARE ABLE TO GUARANTEE LEGAL CORRECTNESS AND THEREFORE RELIEVE YOU OF THE RESPONSIBILITY FOR WAGES PROCESSING. WE CAN SET THE SOLUTION EXACTLY ACCORDING TO YOUR REQUIREMENTS, AS WELL AS THOSE OF YOUR COMPANY – ATTENDANCE MANAGEMENT, HR MANAGEMENT.
